

**Ambient AI clinical workflow platform purpose-built for physical therapy**

**<https://invest.fownd.care>**

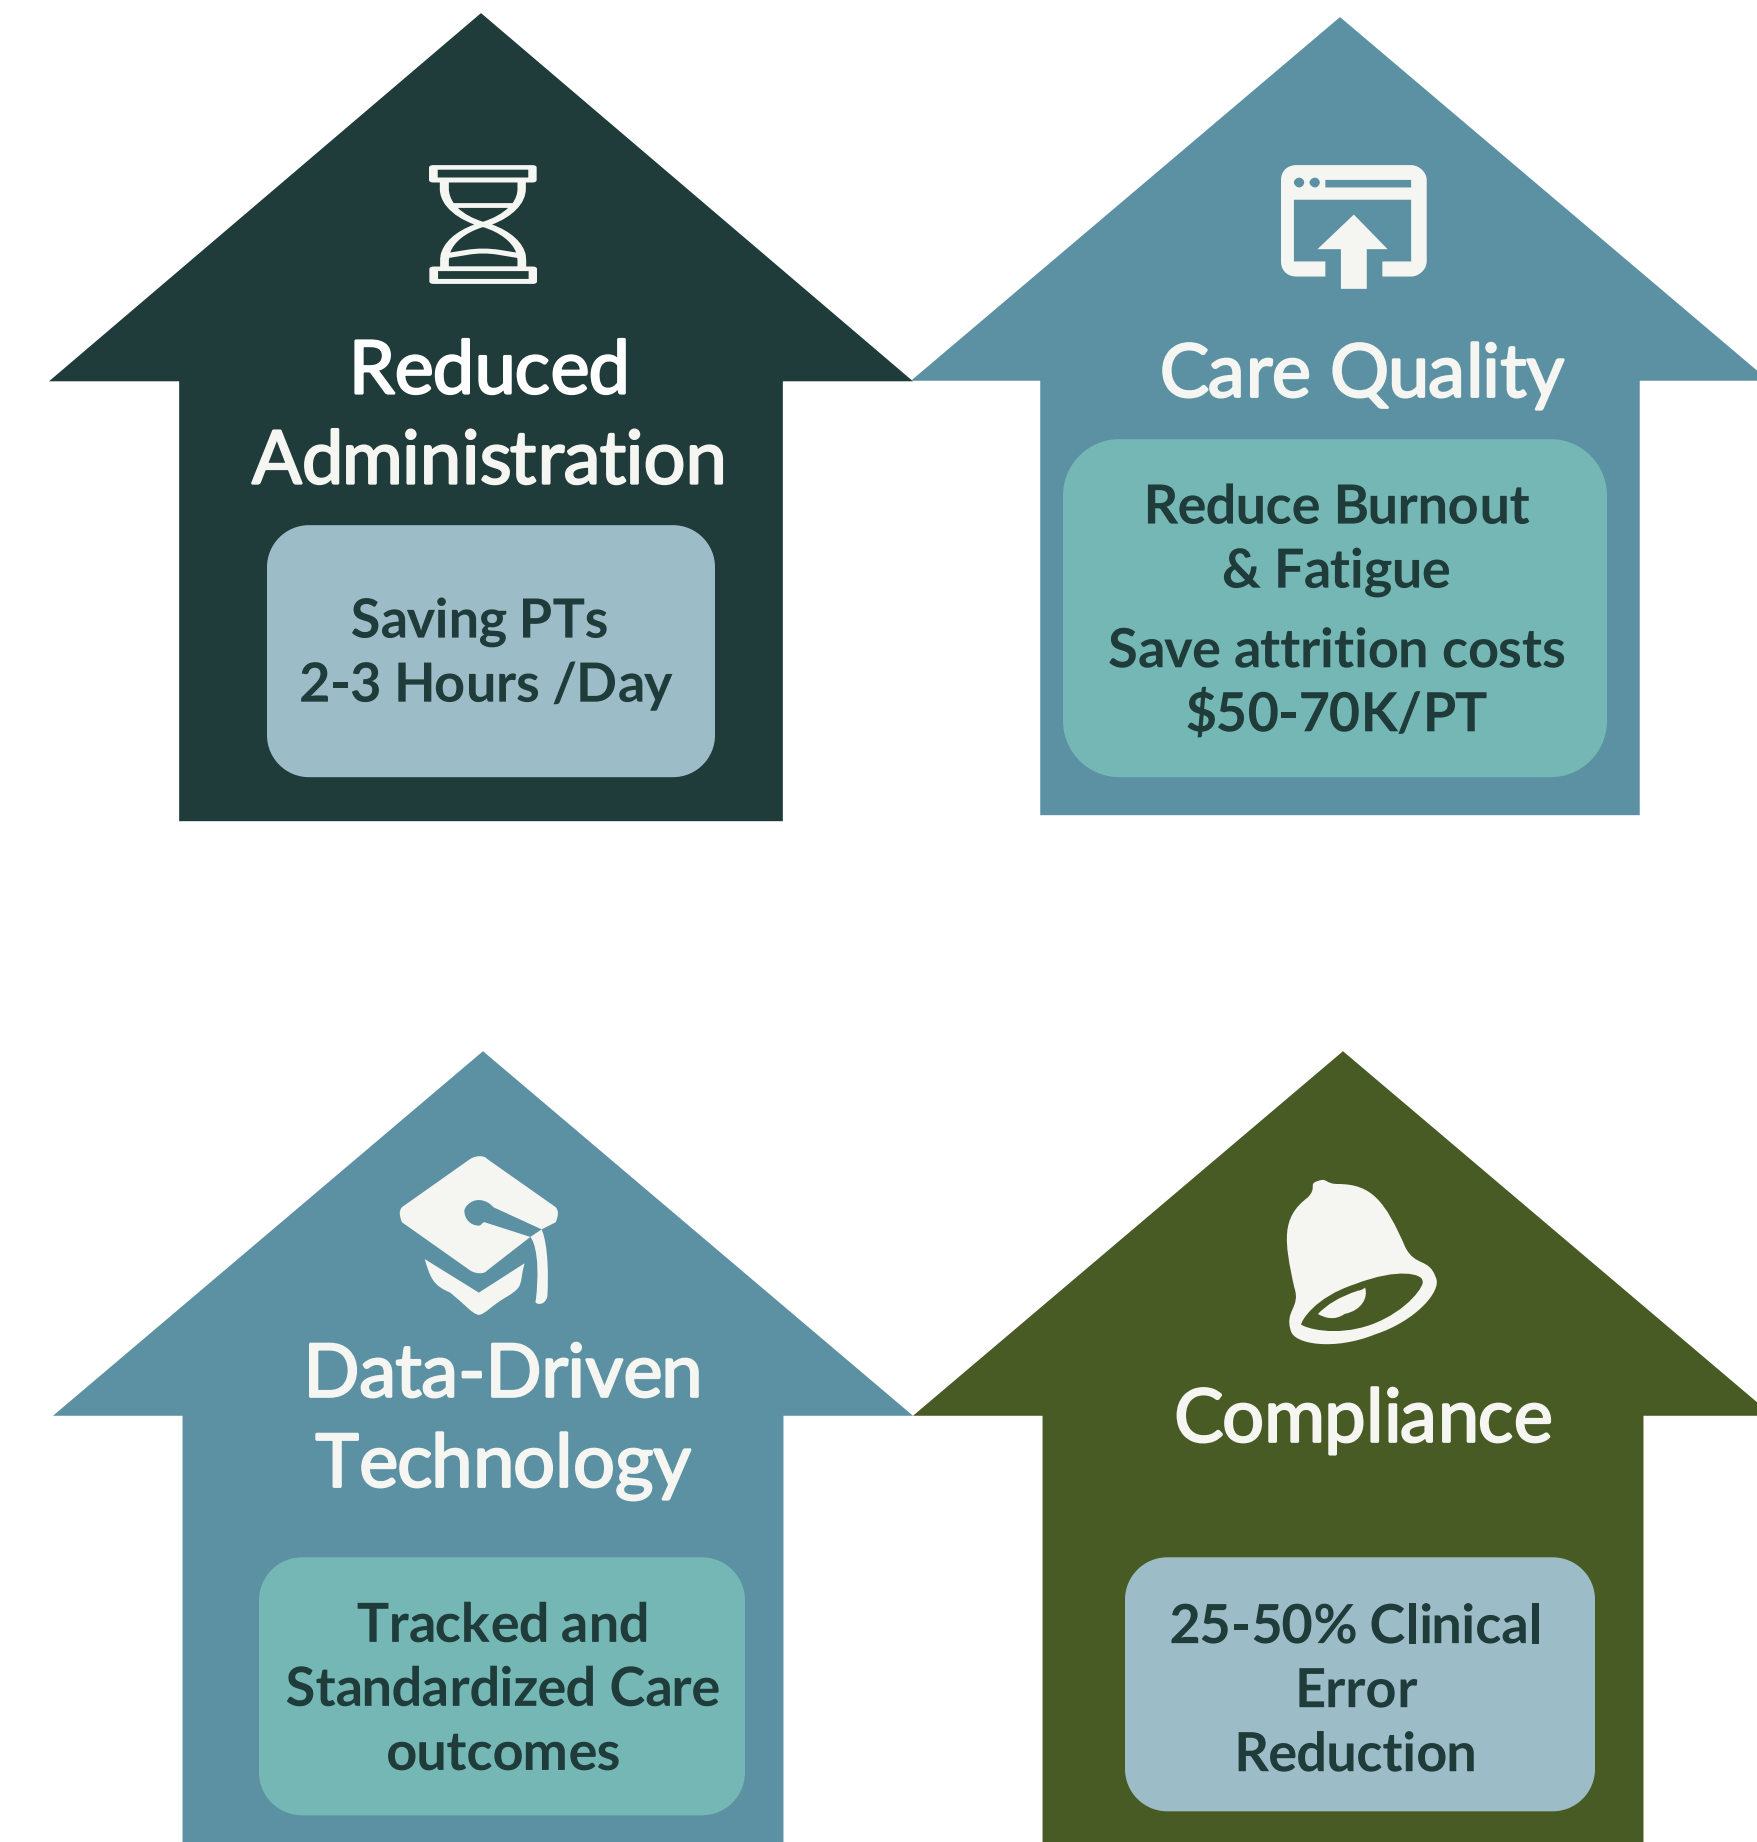

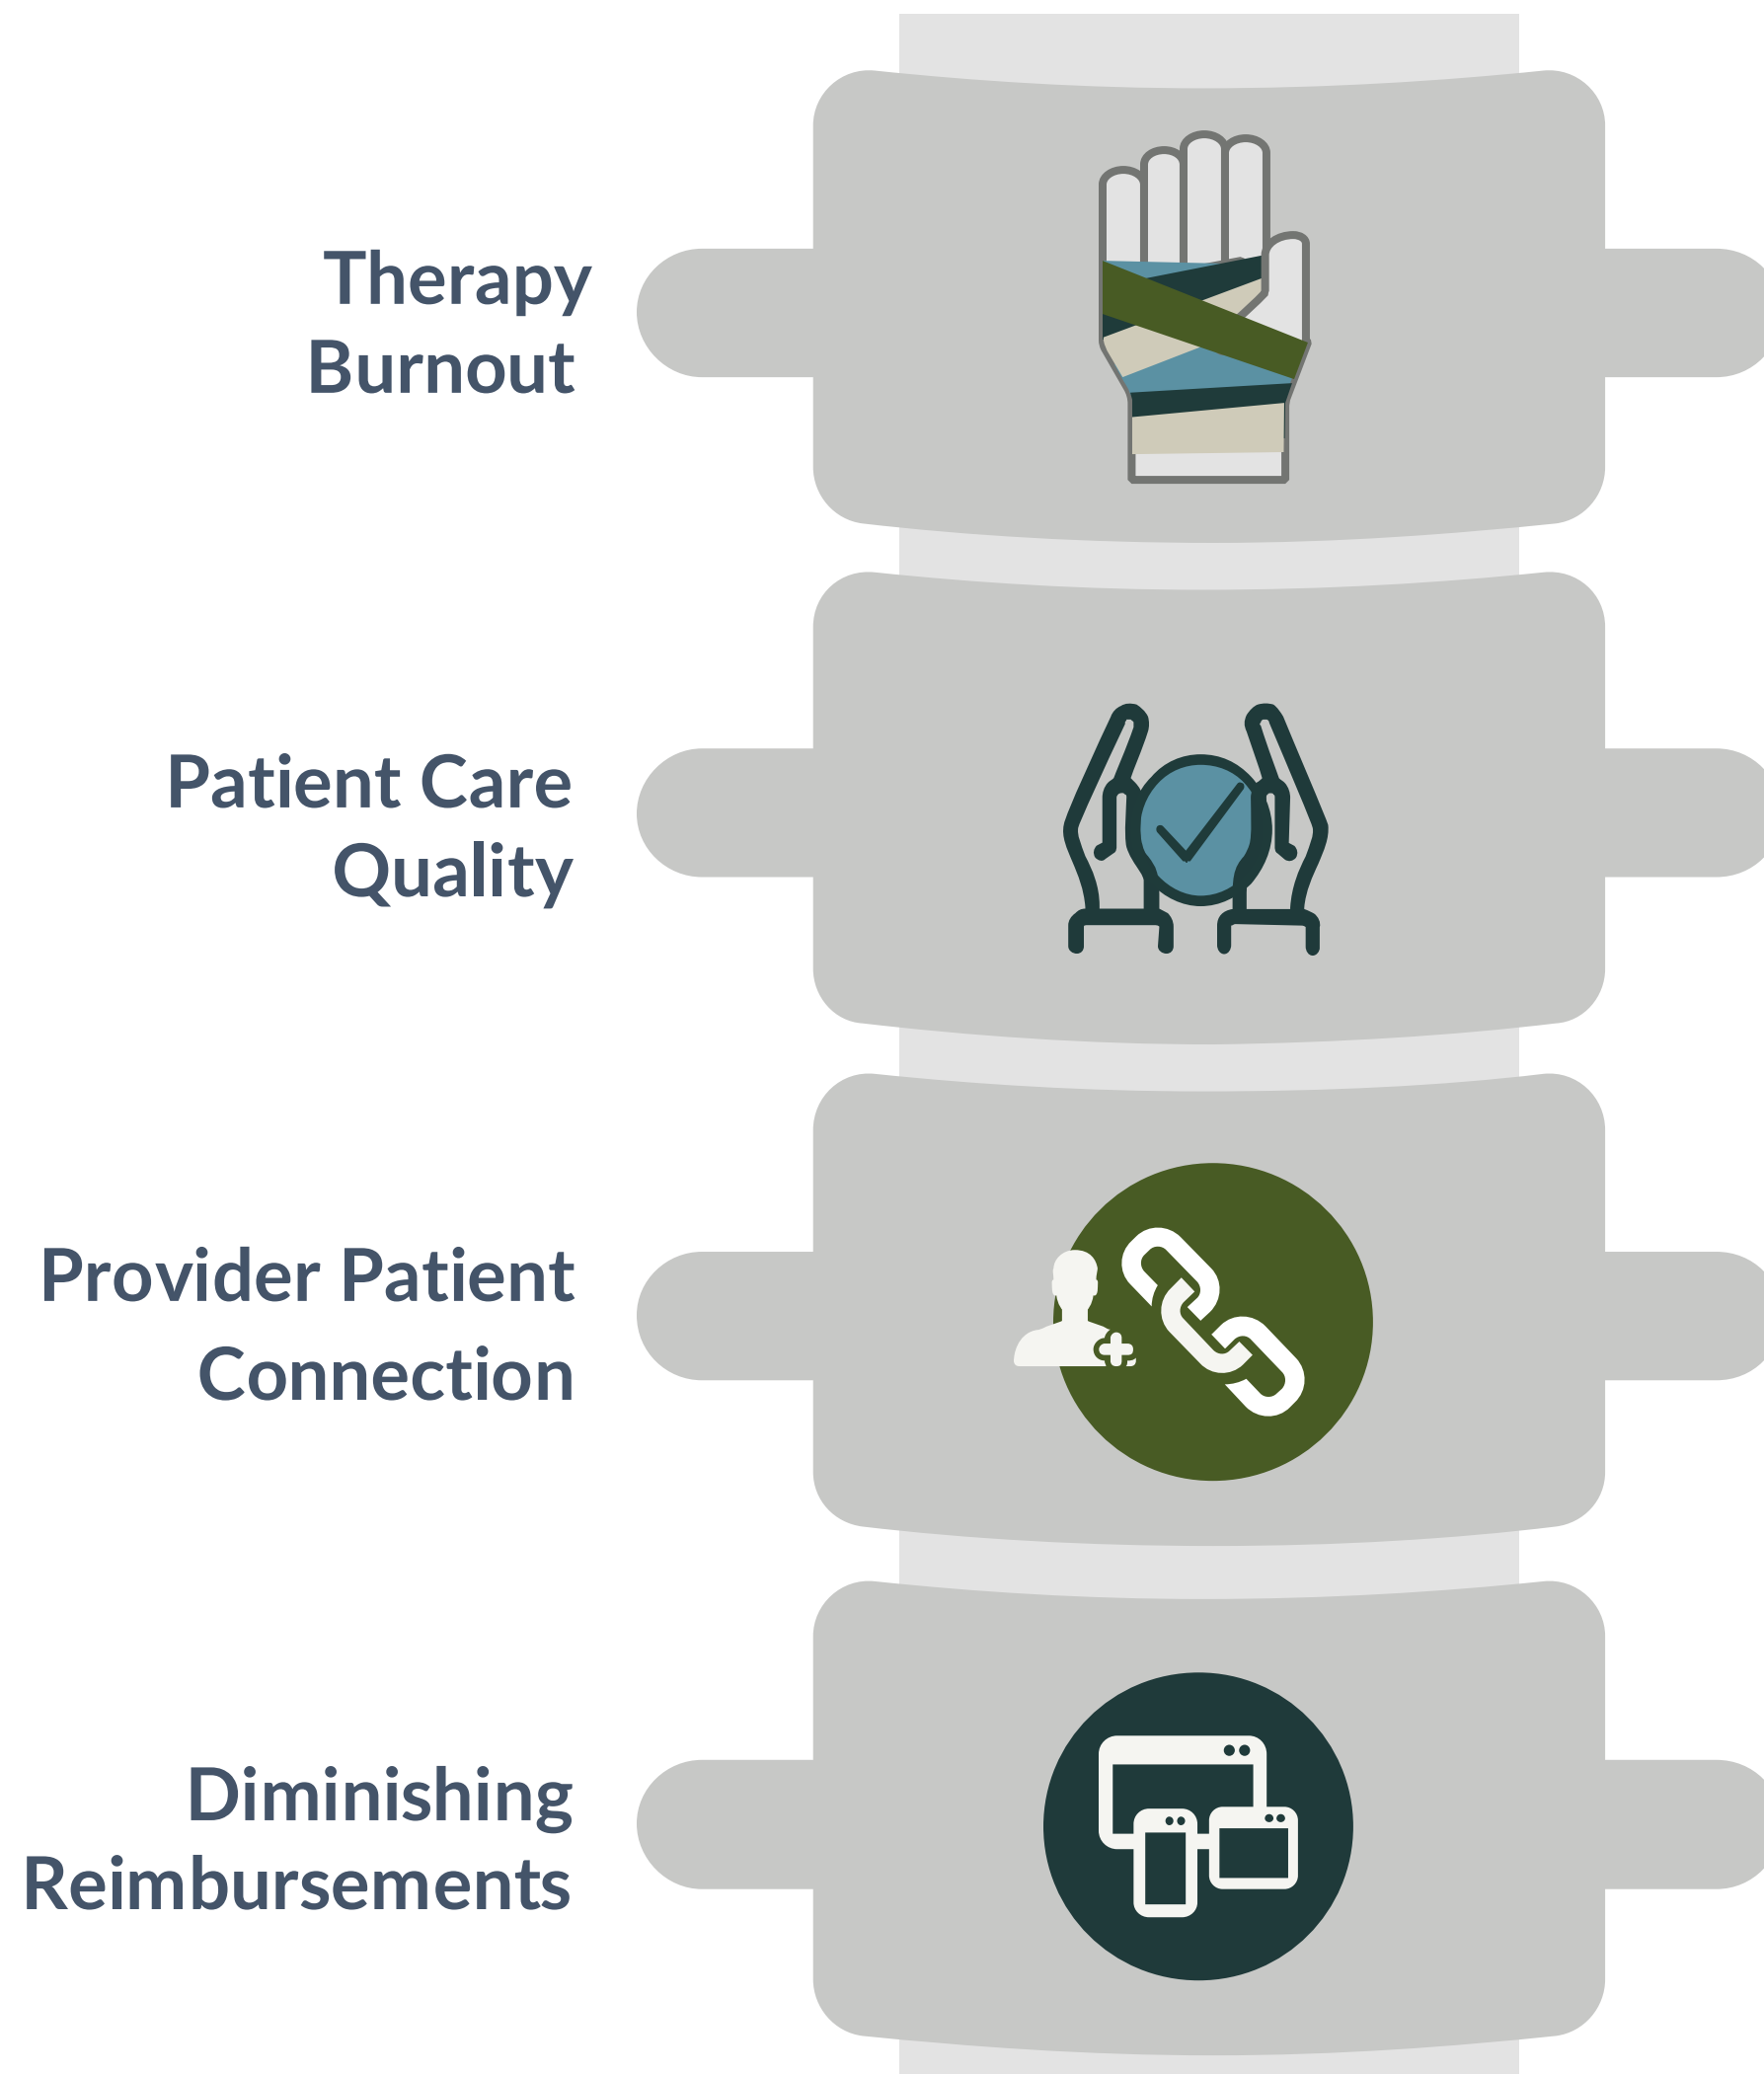

**aws activate**  
Portfolio Startup

# The Problem: Therapy Paradox

2

*Today's physical therapists see several patients at a time. They prioritize revenue over quality care and therapists' professional satisfaction.*

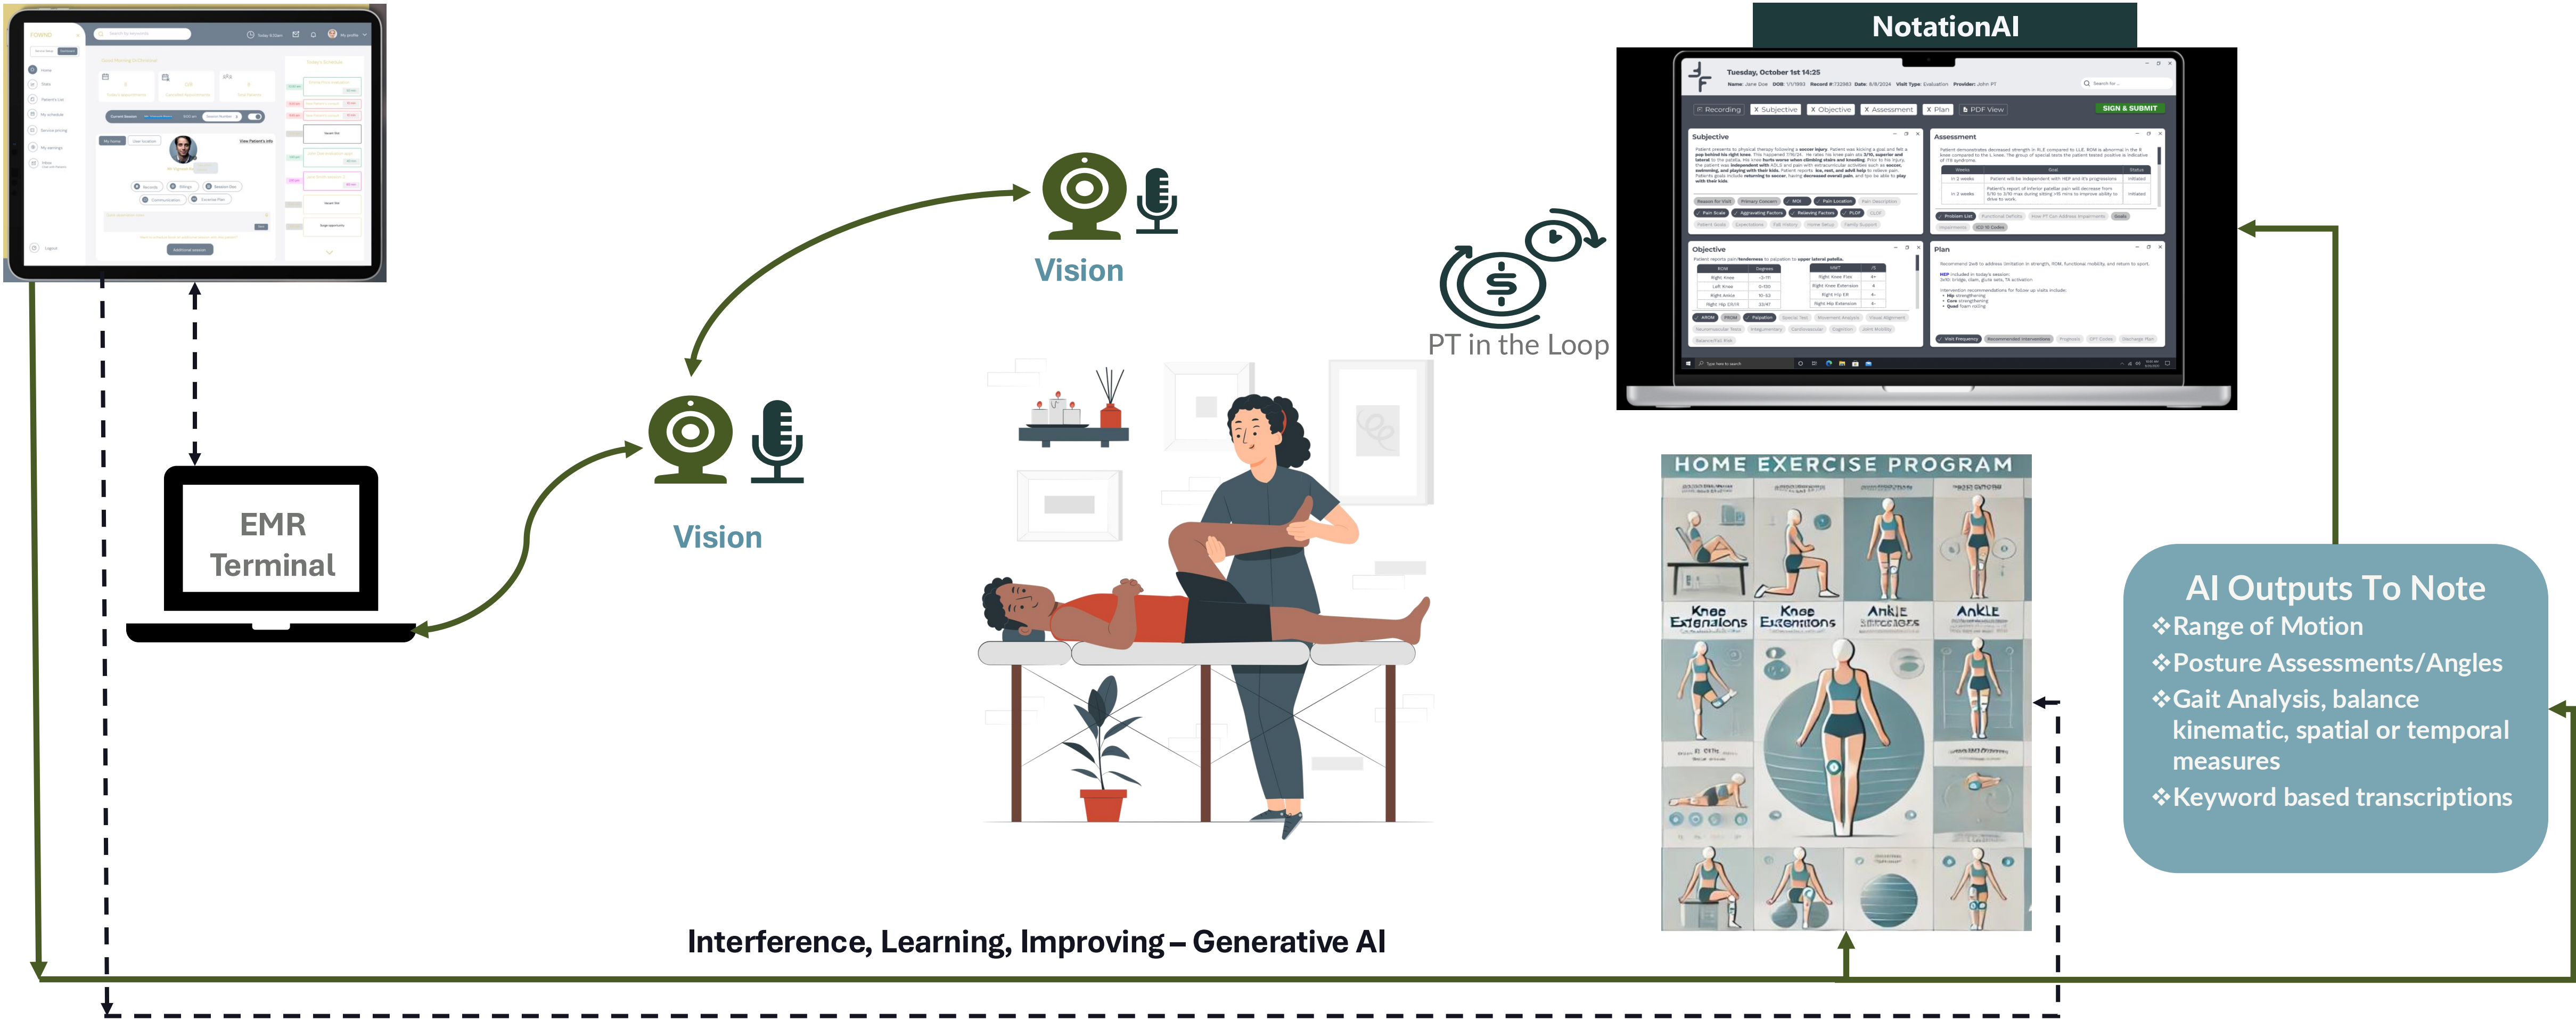

*"Clinicians need to ditch the paperwork grind and get back to what matters most—delivering exceptional care."*

# Why Now? AI/ML for PT beyond a typical scribe

Standard Clinical workflow  
FOWND Innovation

3

Practical implementation of Artificial Intelligence in clinical environments

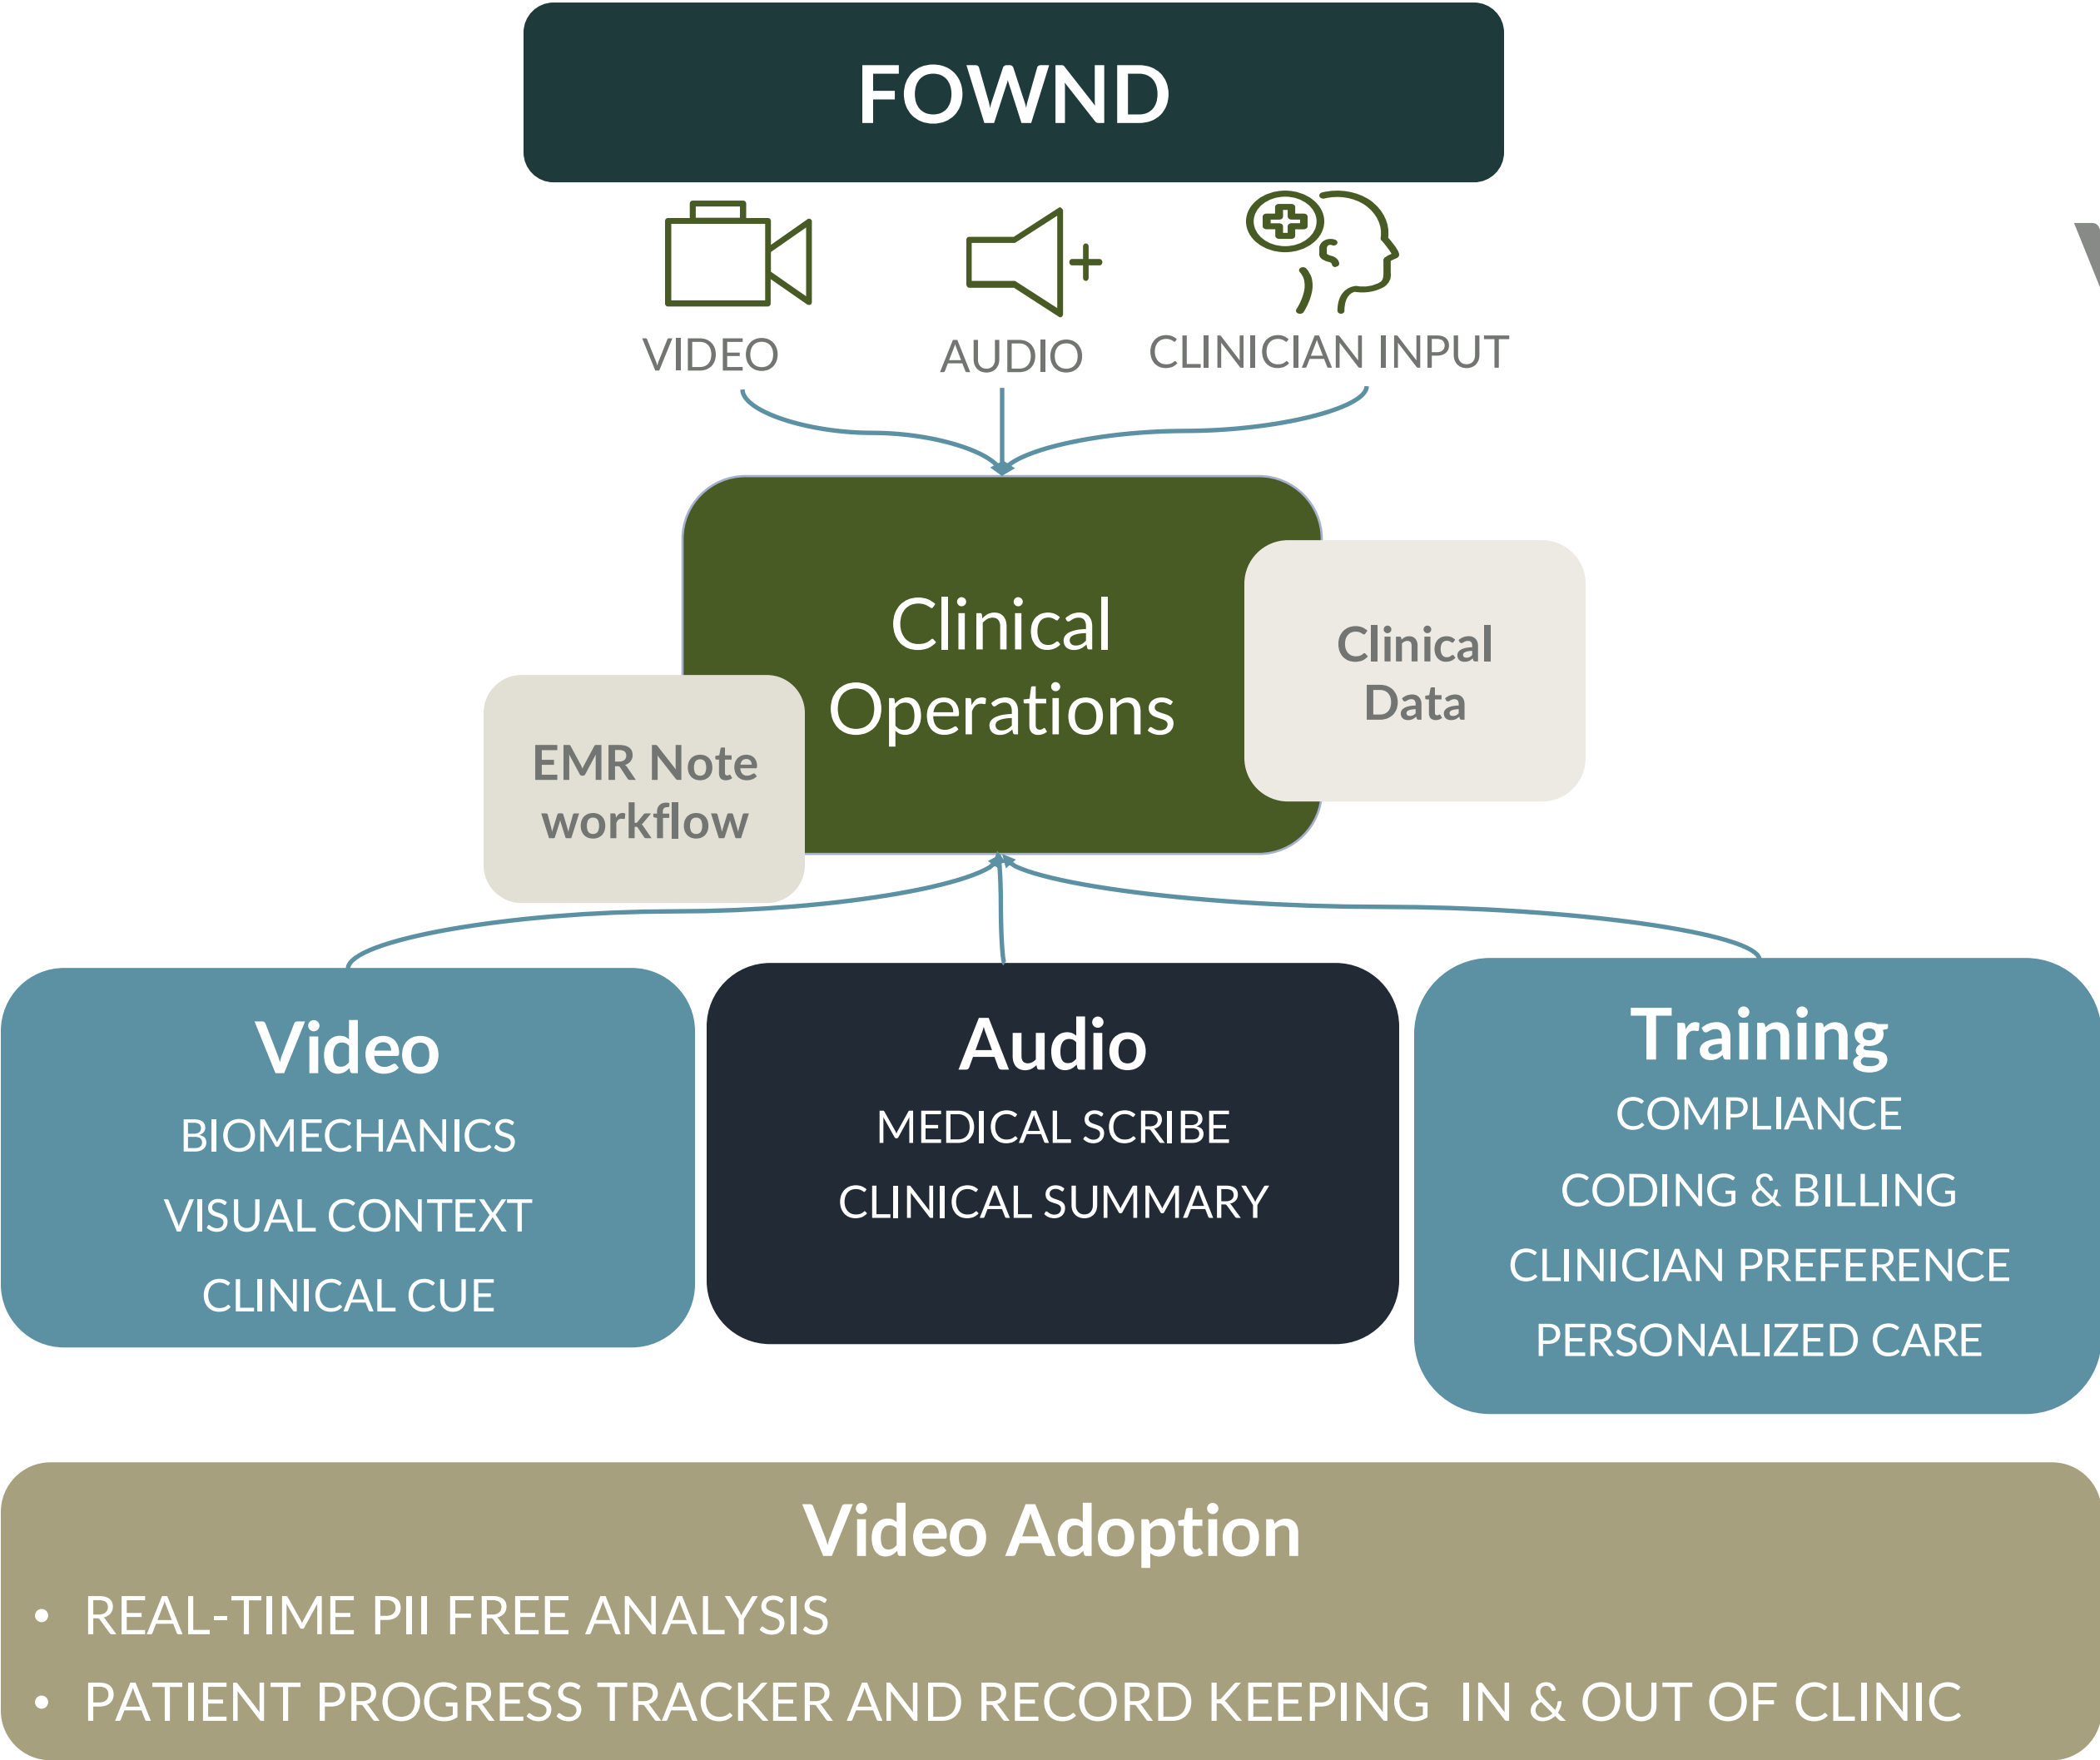

Clinical documentation built, real-time with audio-visual context

Purpose built GenAI generates HEP, plans & progress trackers

# Why it matters. Specific yet domain-specific technology

VS

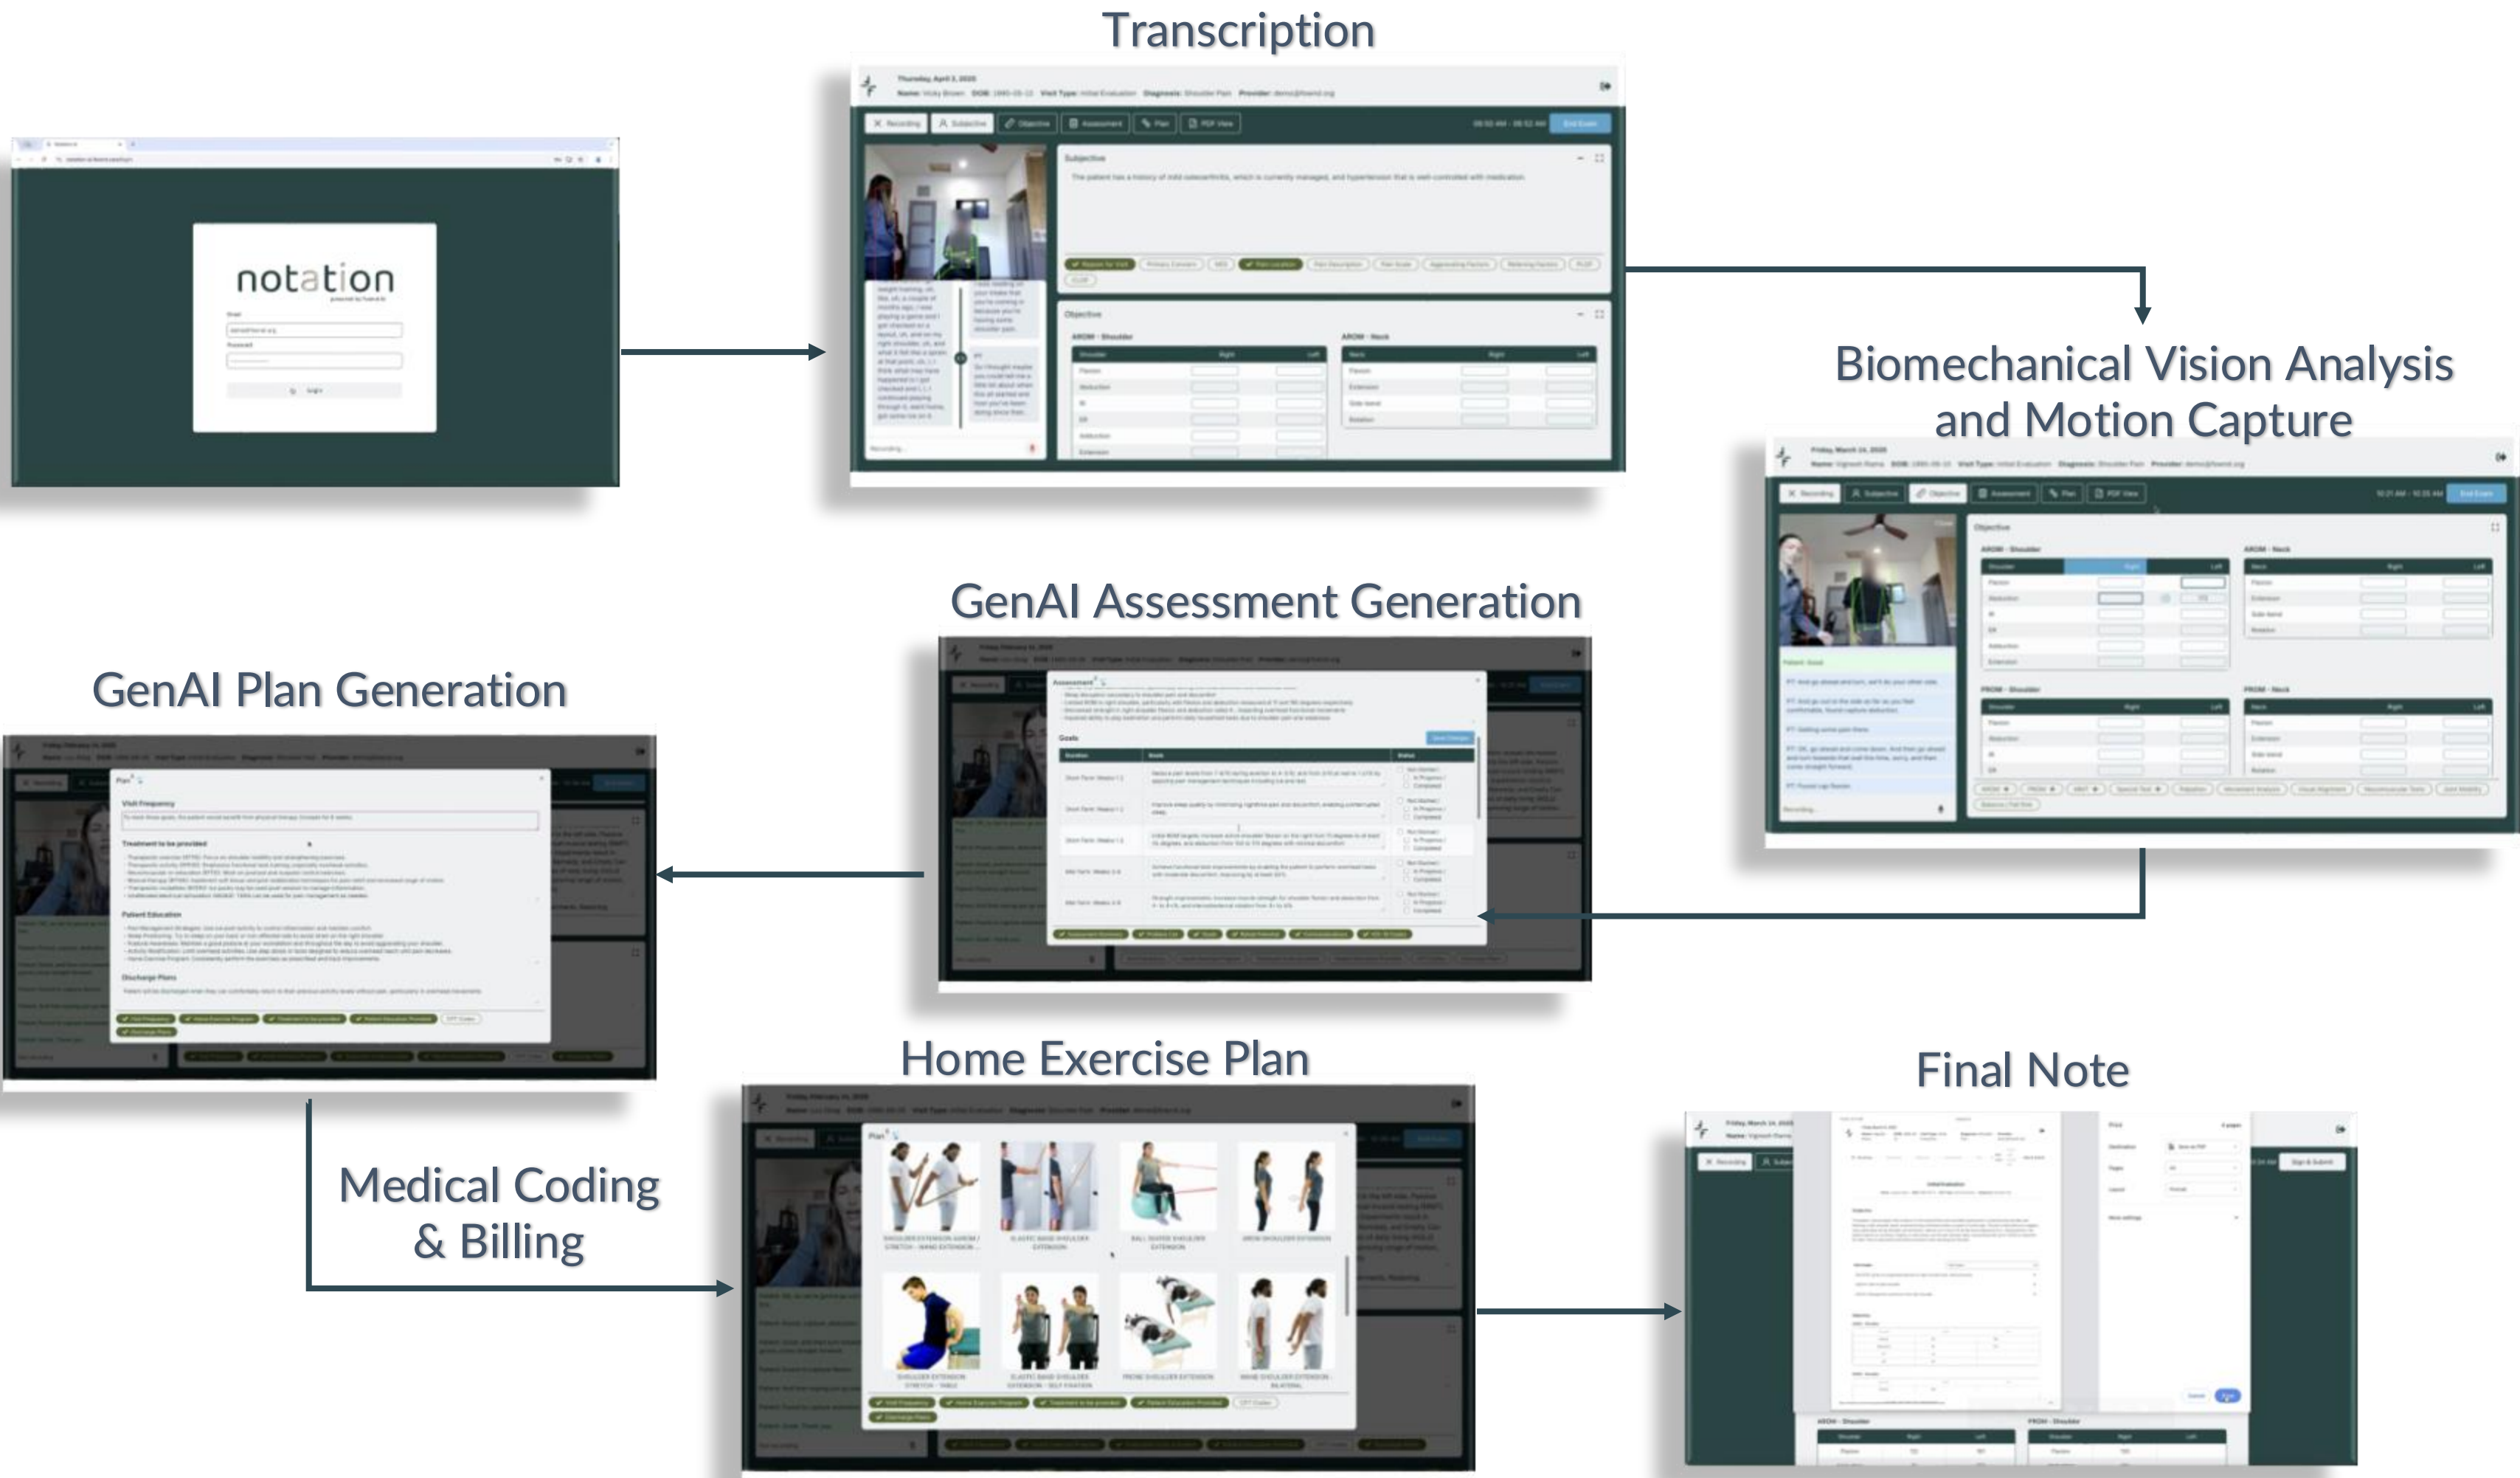

## Competition

- ✓ Transcription and Summarization
- ✓ Easy audio-only adoption
- ✓ Fewer compliance, security, and data-security hurdles for implementation
- ✗ Not optimized for functional care and PT workflows
- ✗ No visual markers/indicators for context lacking in conversations
- ✗ Requires considerable input and corrections
- ✗ No real-time training from clinician inputs

# Notation in Action

“Time is precious, but we Fownd it – Worlds first *Ambient Clinical AI Assistant* for physical therapists.

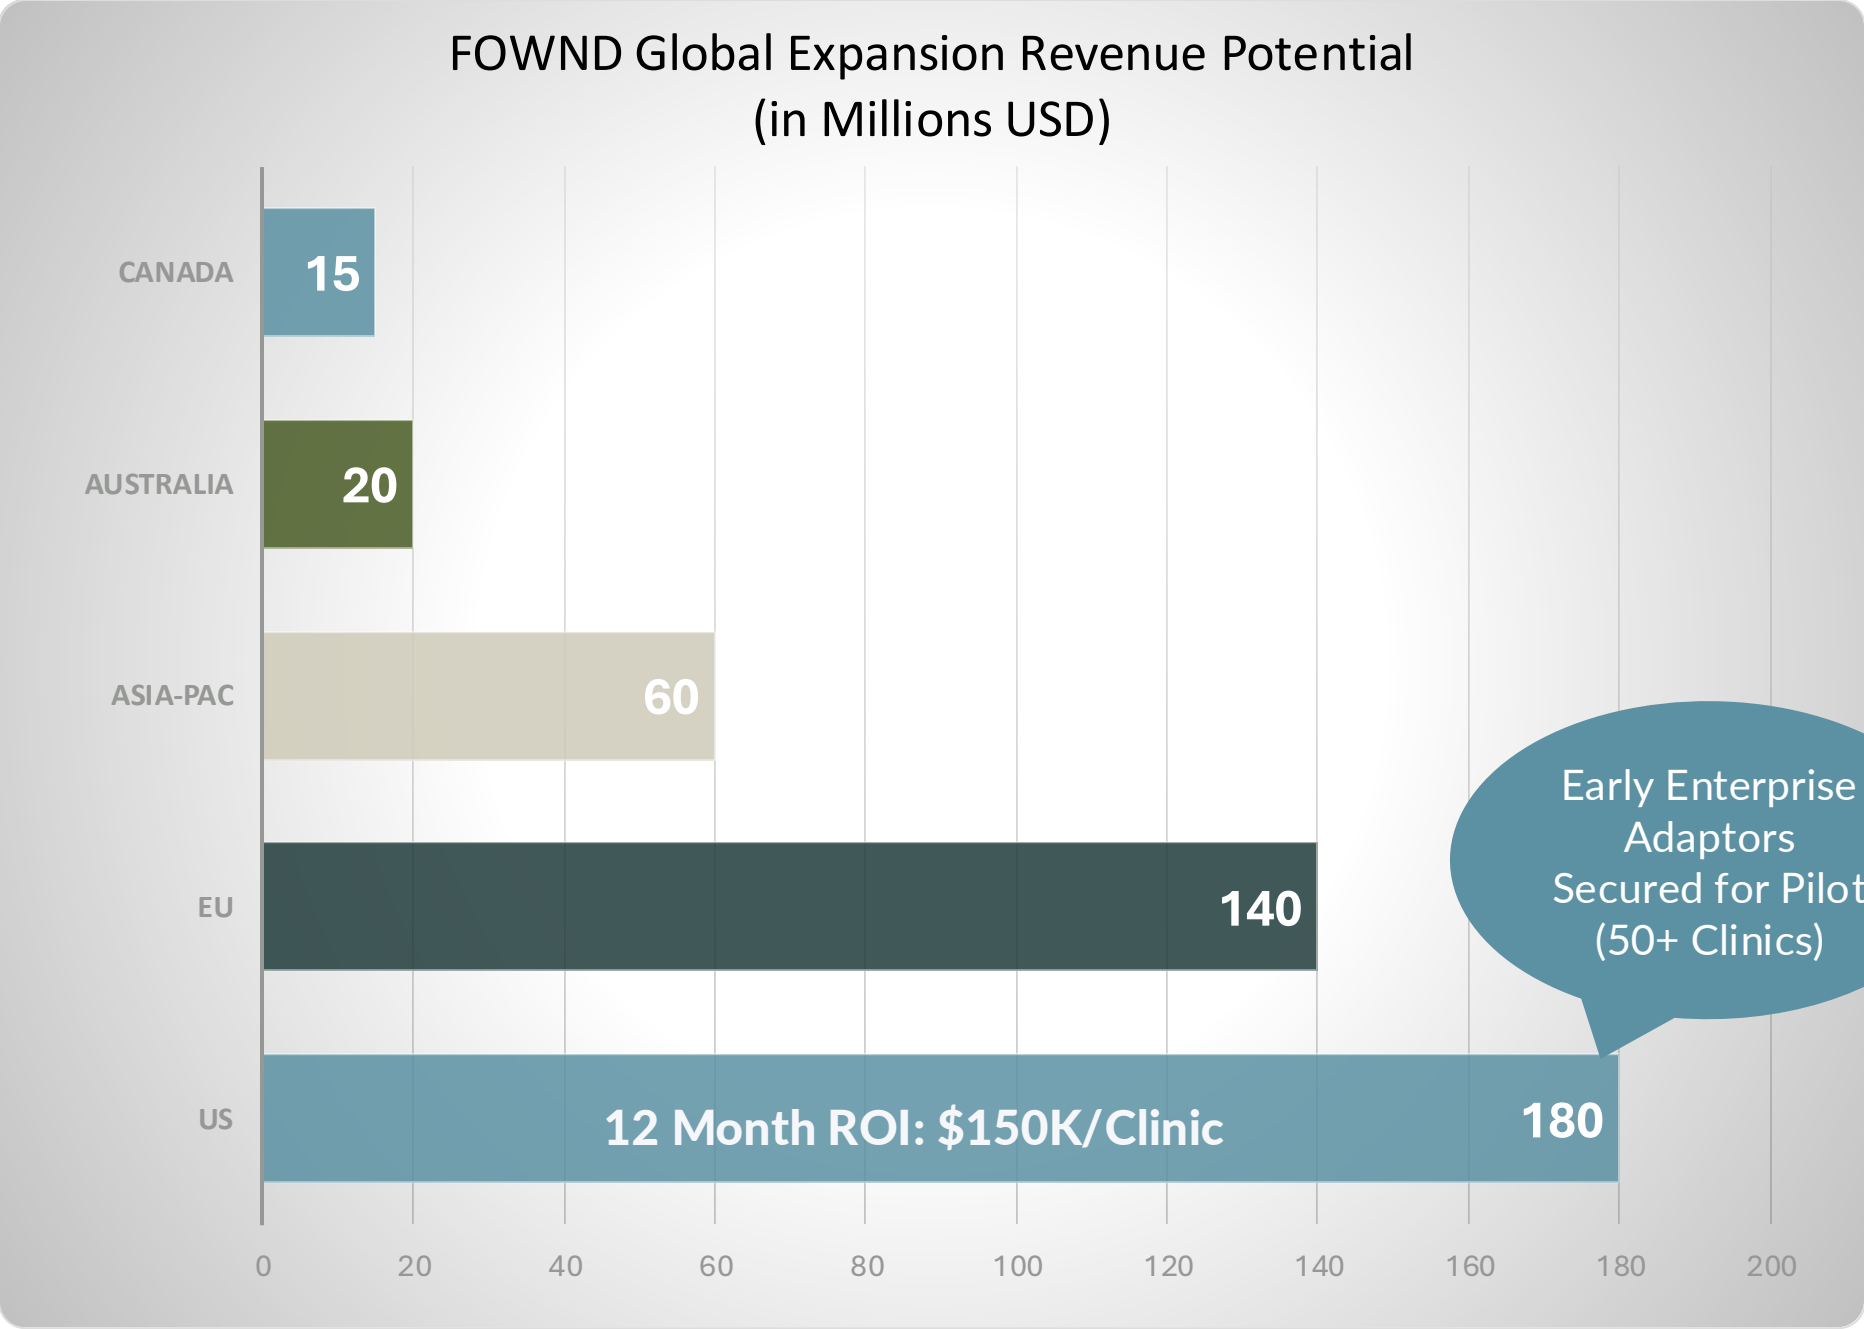

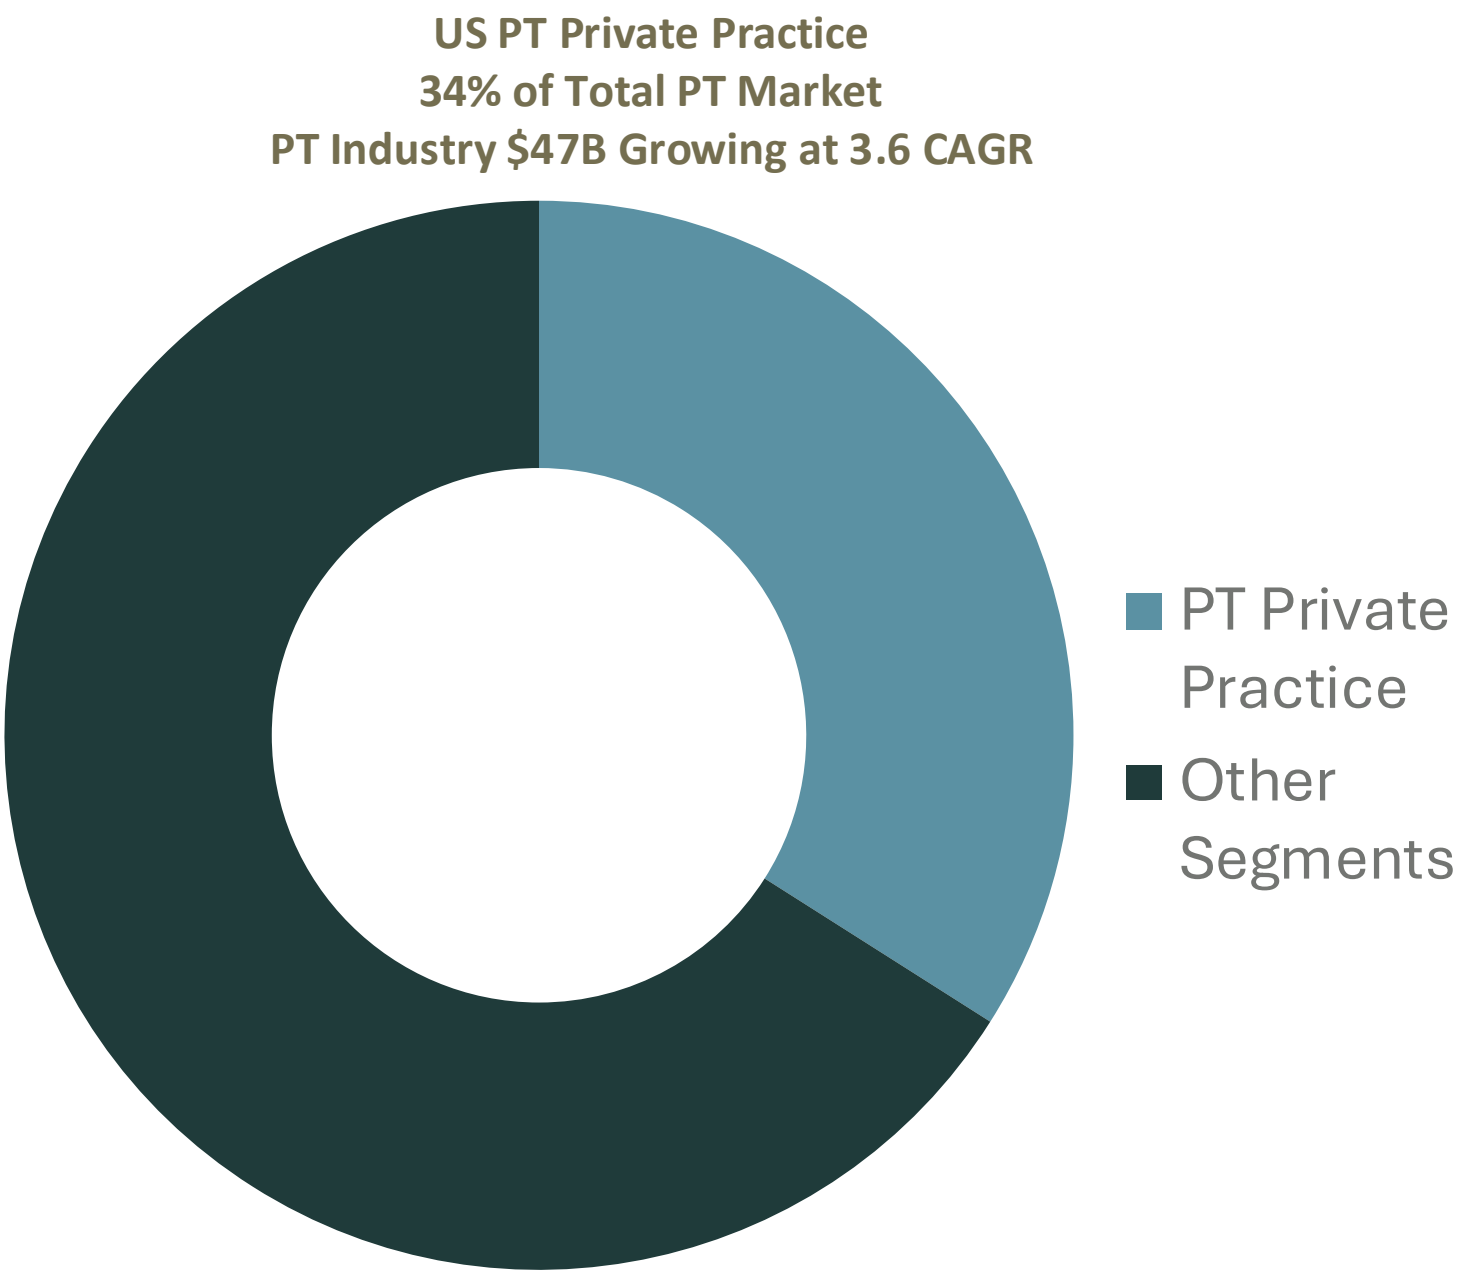

“With your vision, you have the opportunity here to standardize care across the industry, which would then allow us to have real data and efficacy measures. “  
-----Owner, KIME Performance, CA, USA

“The demo last week was amazing, and you have made lots of progress...I would love to talk more about integrating your platform into AgileEMR sooner than later.”  
-----VP, Agile PTP – 150+ PT clinics

That is beyond awesome. That is what PT needs to improve efficiency, improving coding / billing accuracy. It also helps to control defects and ensure that documentation across all therapists is appropriate and at a high level of professionalism.  
-----Clinical Manager, PT Solutions

AI-Native Entry into a \$3.6B Market — with Global Expansion Upside

GTM Focus: Start with 5% of U.S. Private Practice Clinics → Expand to Global PT Market

Market Insights

300M PT sessions/a year in the U.S.

Manual documentation → \$3B lost productivity

AI Adoption in healthcare growing at 46% CAGR

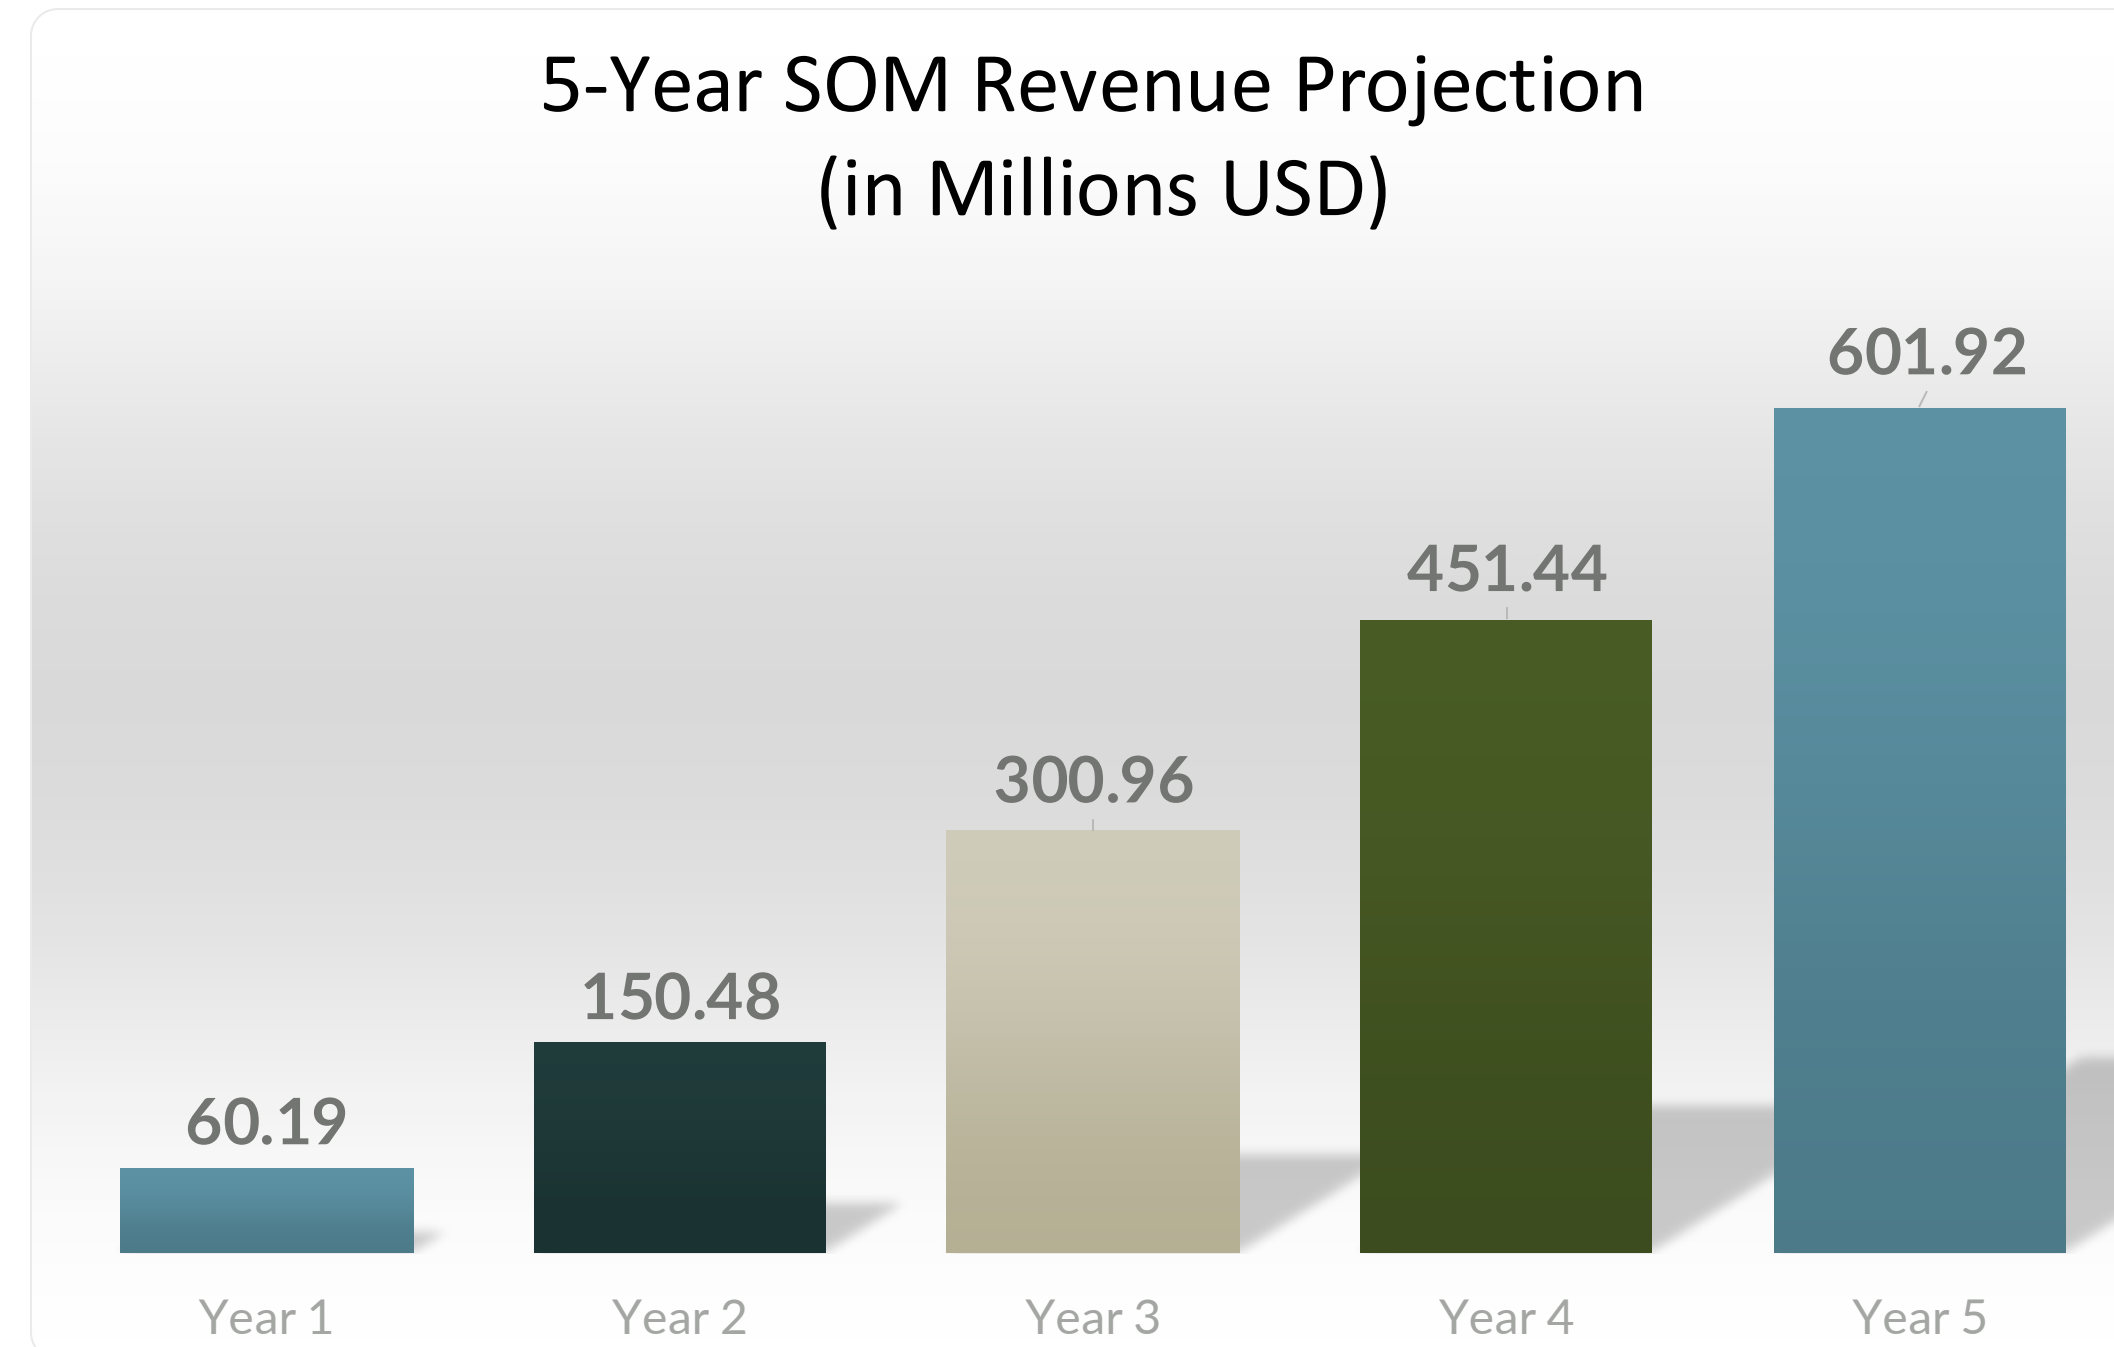

Private practices (34%) = fastest to adopt AI

Expandable TAM: Occupational Therapy, Speech Therapy, Chiro, Home Health

# Scaling the Business and Revenue Modeling

**\$75 Value Unlocked Per Session**  
Driven by billing accuracy, compliance, and speed

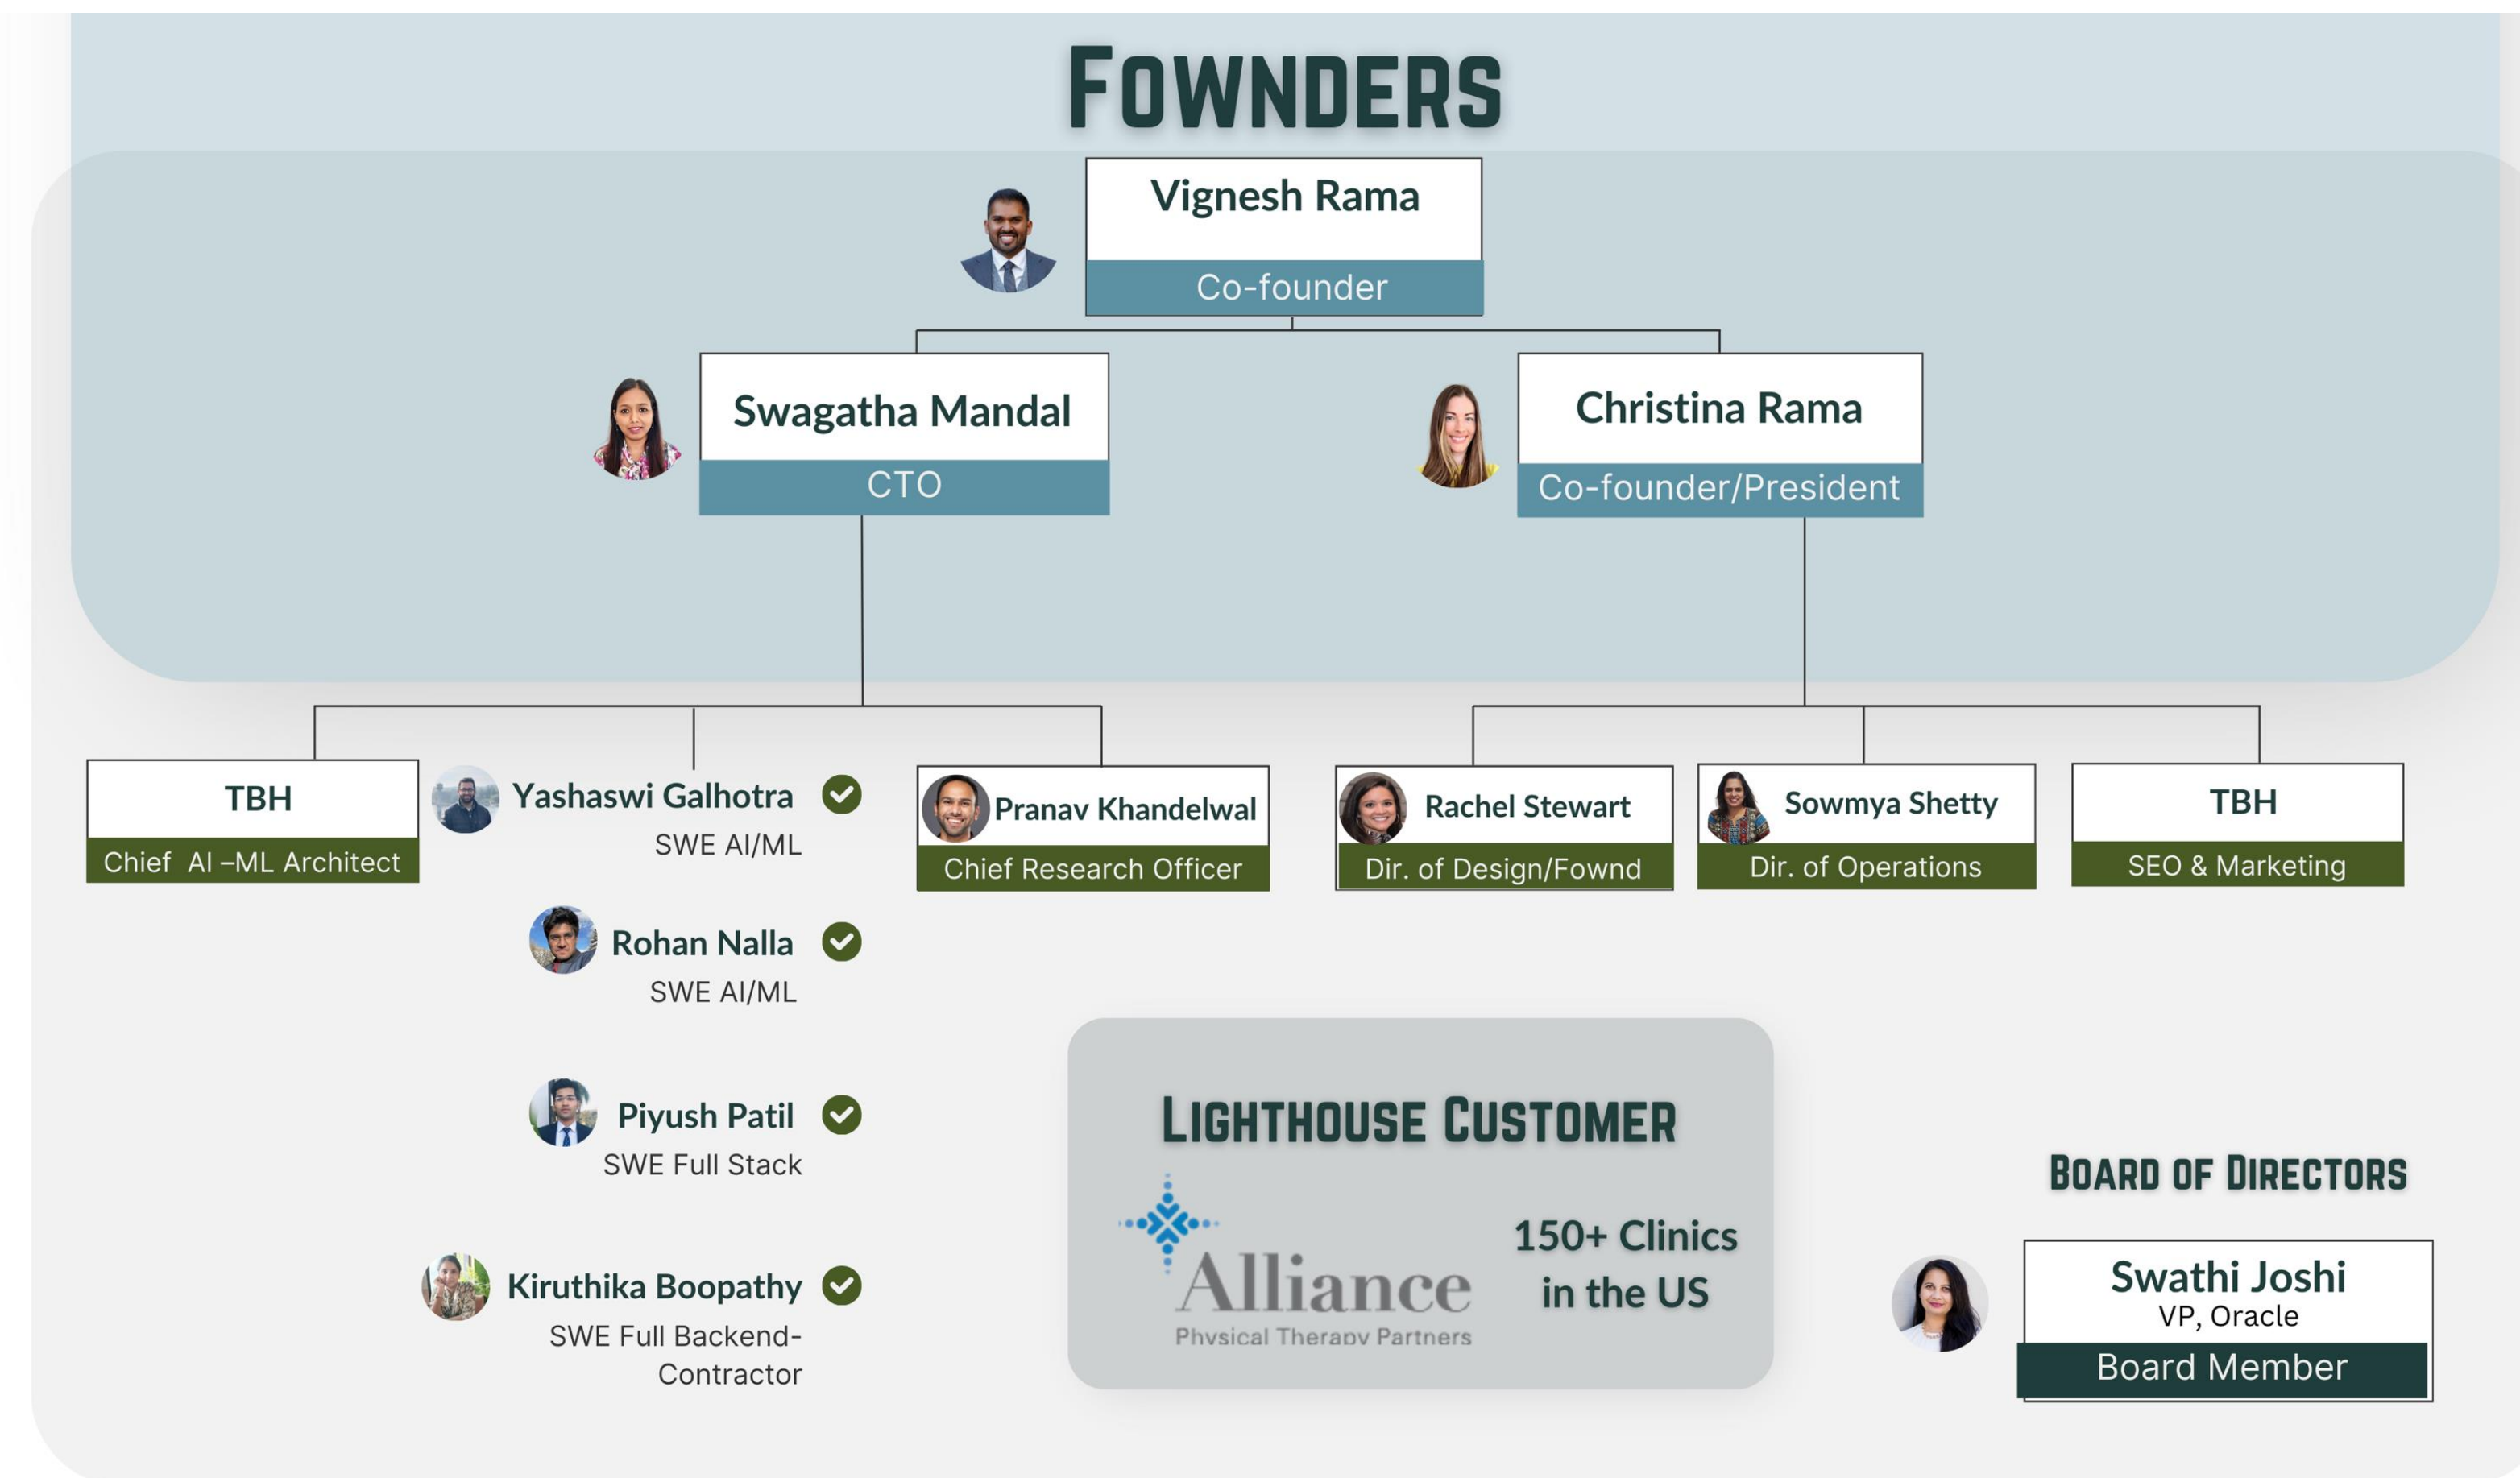

Assumes 38,000 clinics × 1–10% adoption over 5 years. Revenue uplift of \$150K+/clinic/year based on 2,112 sessions annually at \$75 gain/session  
Aligned with Medicare and private payer benchmarks

# The Team

9

“25+ years of combined expertise in clinical operations, biomechanics, enterprise software, and AI-ML”

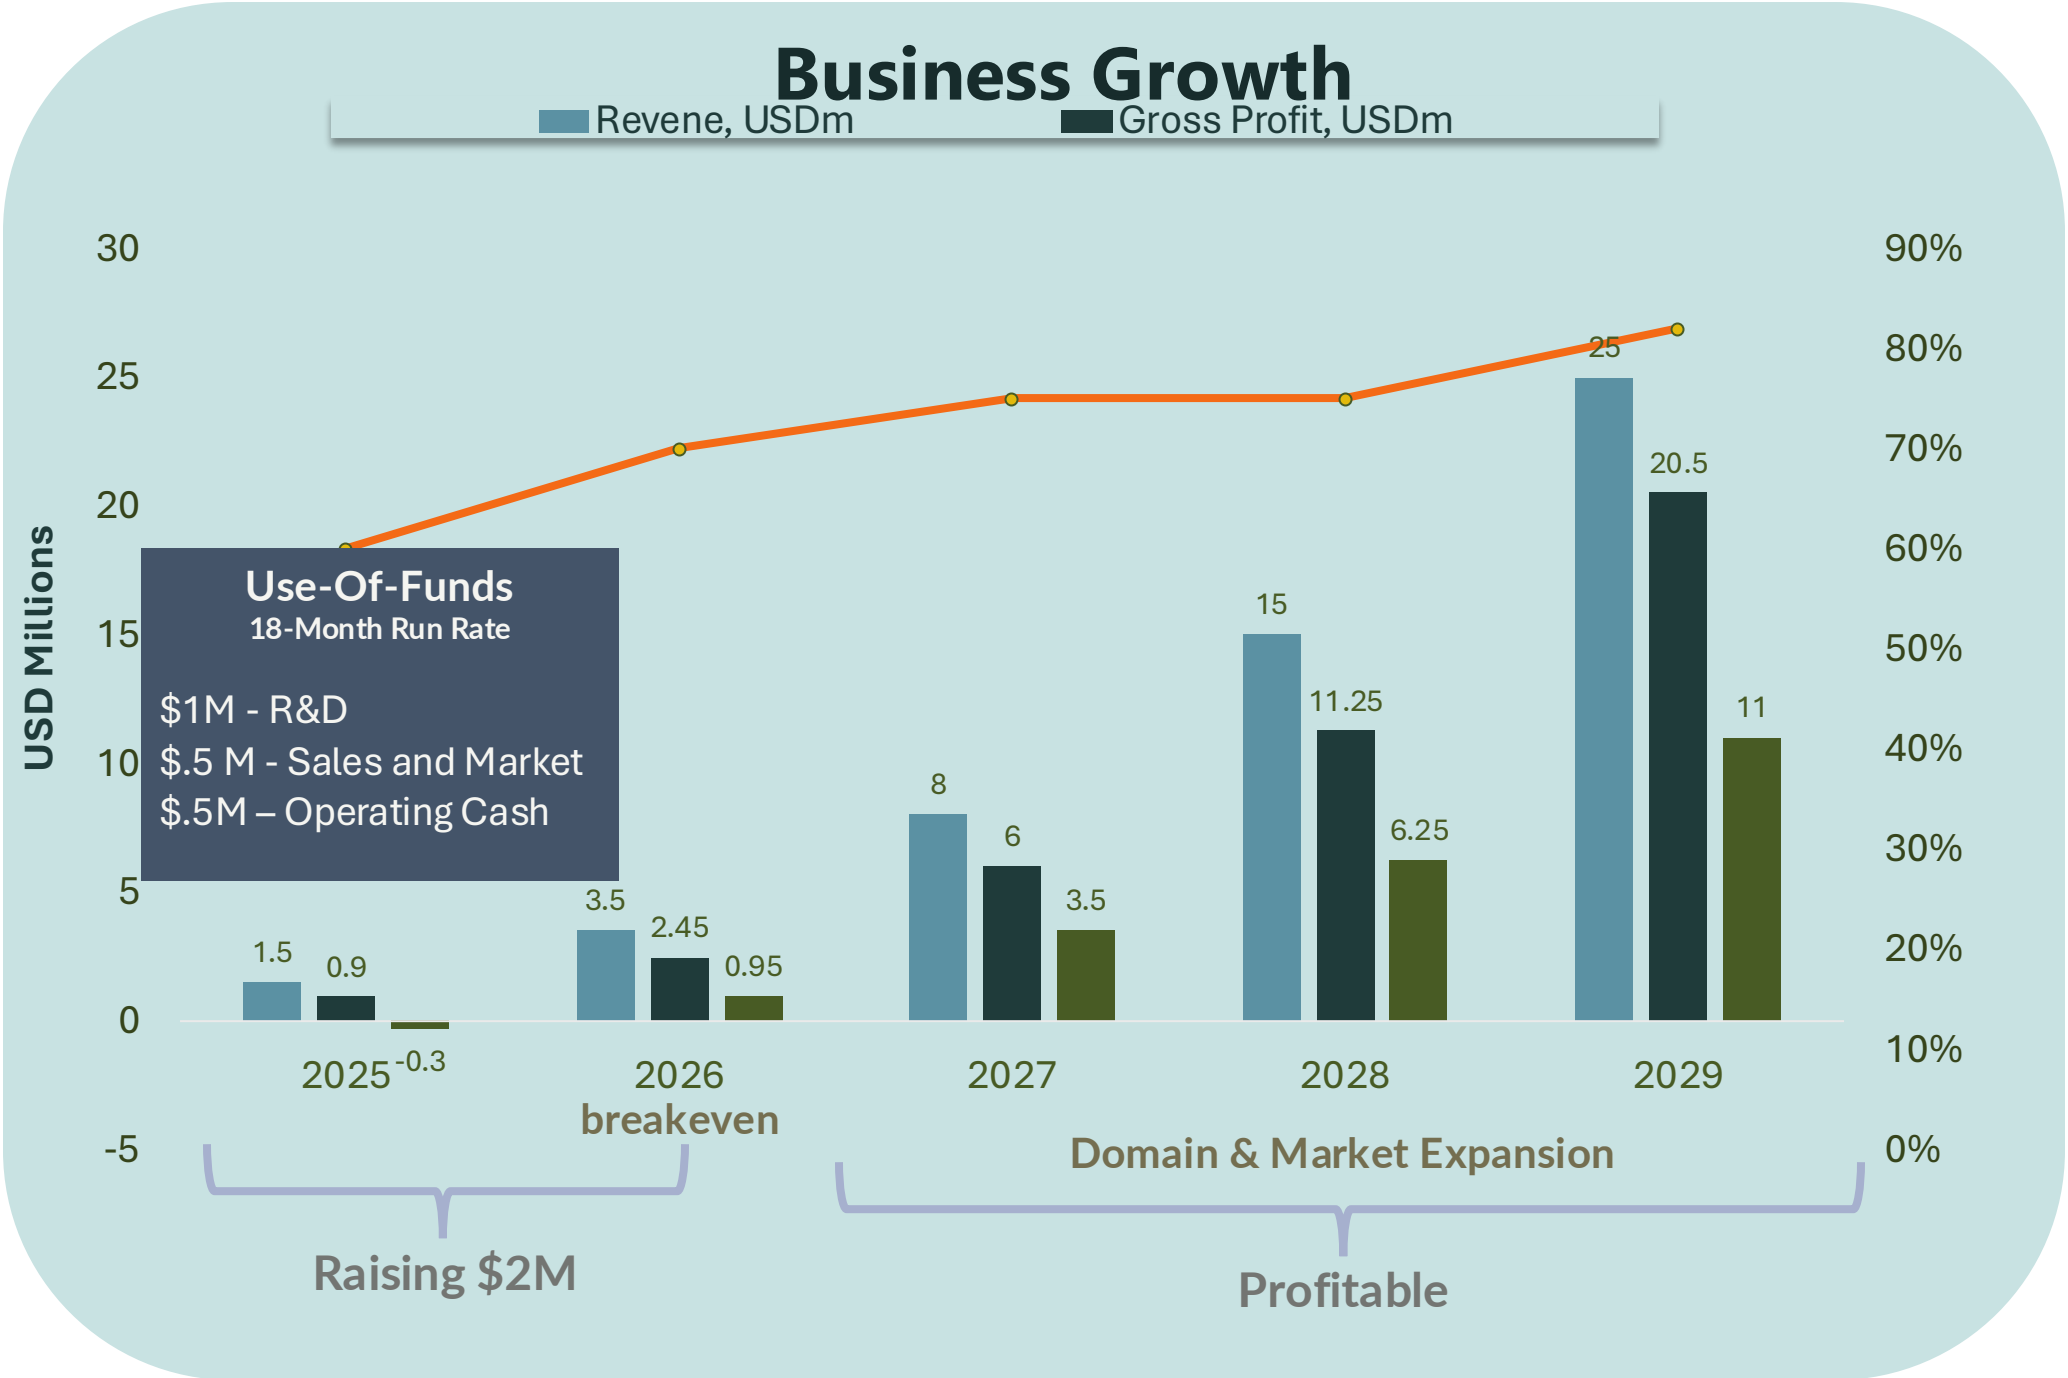

*Innovation Partners*

# The Competitive Landscape

Features	Fownd Inc	Webpt	Theraoffice	Clinicient	Nuance Dragon Medical one	Suki	Ambience AI
Revenue/Raise	bootstraped	\$150M	\$3.5	\$19.9	\$8.7M	Series D (\$450M)	Series B (\$100M)
Therapy Procedure Assistant	Yes	No	No	No	No	No	No
Computer Vision, Large Vision Model assistant for Biomechanics, Kinematics	Yes	No	No	No	No	No	No
Speaker diarisation & clinical context	Yes	No	No	No	Yes	Yes	No
In session speech to text transcription	Yes	No	No	No	Yes	Yes	Yes
Integration with other EHR system	Yes	Yes, limited EHR integration	Yes Multiple EHR system	Yes Multiple EHR system	Yes Multiple EHR system	Yes Multiple EHR system	Yes Best
Home Exercise Program and Care	Yes, Customizable with remote monitoring	Yes, Integrated HEP tools	Yes	Yes	HEP via voice	HEP via voice	No
Autonomous Diagnostic Coding and Compliance	Yes	No Manual	No	No	Yes	Yes	Yes
Clinican-in-the-loop AI	Yes	No Manual	No	No	Yes	Yes	Yes

Ambient AI with computer vision and deep learning with high clinical ROI improves CLTV.

Reclaimed time, improved compliance, additional revenue: FOWND drives scalable, profitable growth.

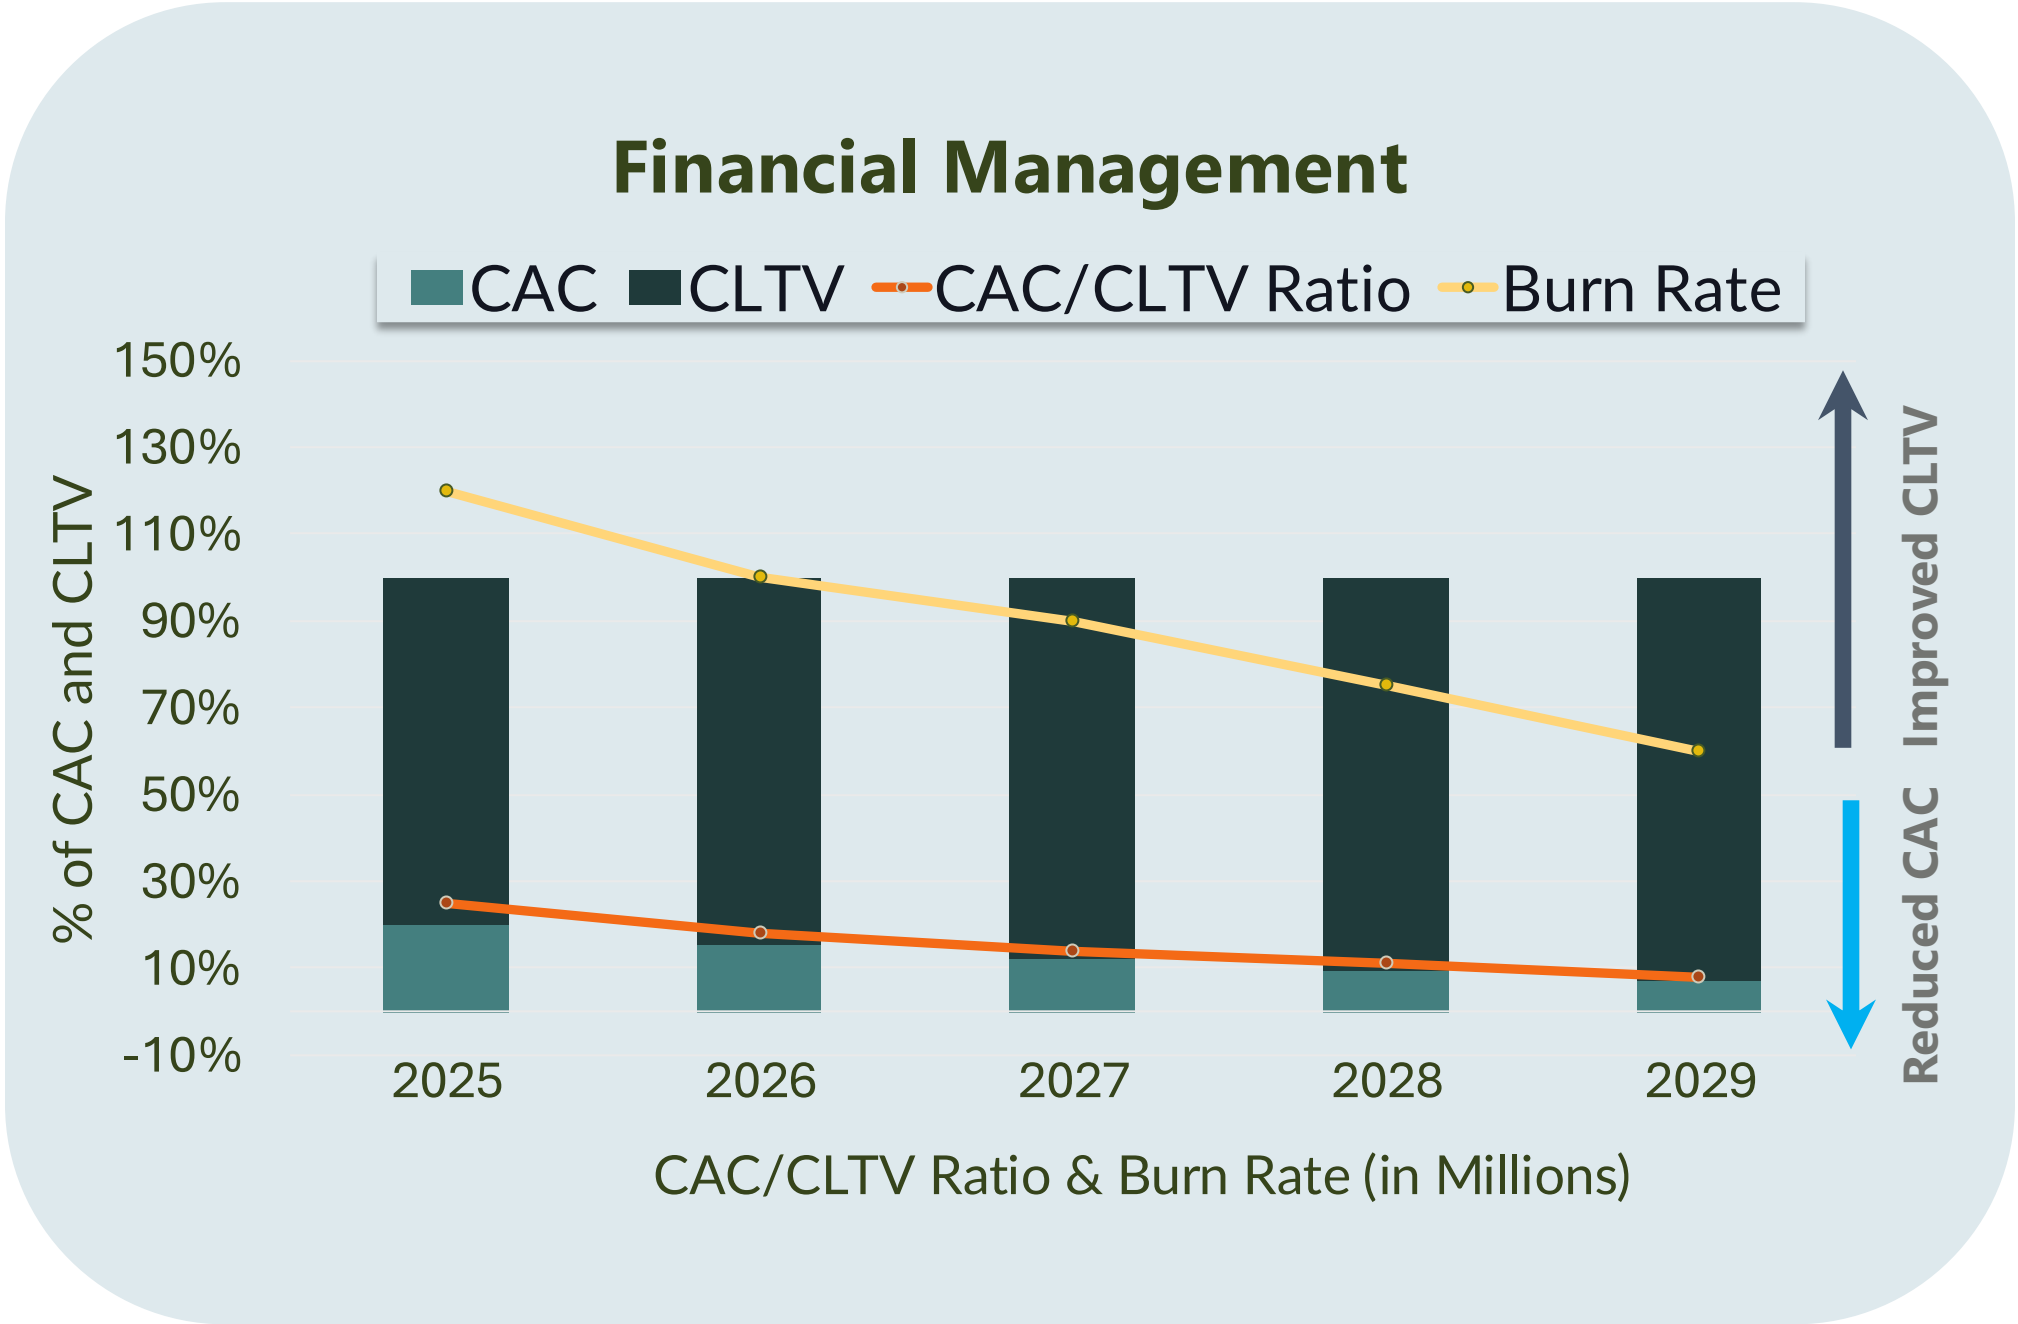

Scalable Growth Levers

75% Gross Margin by 2027

EBITDA turning positive in 2026, \$11M Year 5

Expanding beyond to more healthcare domains

Data & Intellectual Property EMR Integrations “AI Assistant for EMR”

## Invest in the future of clinical intelligence and seamless care

**Funding Target: \$2M+**

**Industry/Sector:** GenAI and Deep Learning healthcare startup specializing in physical therapy

**Bootstrapped** with profits expected in 3 years with qualified enterprise customers in the US

**Revenue:** USD 1 Million expected in Year 1 ARR in FY26, Launched in 2024

**Product Development:** “Build the Industry's first clinician-in-the-loop AI Assistant.”

**Clinical Trials & Early Market Penetration:** “Deploy in 10-25 clinics in the waitlist.”

**Team:** 10 Employees

**Looking to Raise:** \$2M
